

	Product Photo	Exhibitor	Product Description
1		<p>Hongfa Electroacoustic (HongKong) Company Limited (Hong Kong) Booth No.: 5G-C02</p>	<p>Latching Relay</p> <ul style="list-style-type: none"> ● Being IEC62055* and ANSI^ standard compliance, our latching relays are strongly capable of anti-fault current (max.12000A) and explosion proof. ● This category of relays are mainly used in meter reading & infrastructure, relay protection, compound switches, lighting control, industrial automation, and energy saving of home appliances. ● Traditional relay maintains a continuous flow of electric current to keep the circuit complete and the electrical device running. With a use of magnet in their design, Hongfa's latching relay is able to maintain the current at a low amp current which would in turn minimise the amount of electricity used. <p><i>*International Electrotechnical Commission's standard for electricity metering</i> <i>^ American National Standards Institute</i></p>
2		<p>HY Electronic (Cayman) Limited (Taiwan) Booth no. 5F-C20</p>	<p>Fast Recovery Epitaxial Diode (FRED)</p> <ul style="list-style-type: none"> ● FRED is with ultrafast recovery time and low forward voltage. It is specially designed for uninterrupted power supply (UPS), inversion welder and power factor correction (PFC) circuitry applications.

3		<p>ISC Inc. (Japan) Booth no. 5G-A23</p>	<p>High-Speed Image Processing</p> <ul style="list-style-type: none"> ● This system can verify the interior structure of an object, whereby the camera can convert the graphic image captured to an electronic file. Unlike expensive apparatus such as conventional Roentgen rays, the installation cost for this system is relatively reduced. ● The camera can capture a 3D image of the entire object with the configuration to rotate object.
4		<p>JL World Company Limited (Hong Kong) Booth No.: 5G-C20</p>	<p>Piezo Speaker Sound Generator</p> <ul style="list-style-type: none"> ● The most outstanding feature is the ultra-thin thickness with only 1.3-1.7mm while the traditional speakers are 4.0mm thick. It also contributes to a lighter weight on final products with only 1.6-2g. ● Piezo Speaker achieves zero electromagnetic interference and water-proof, which avoids the common annoyance to end-users. ● Applicable on telecommunication equipment, computers and peripherals, etc.
5		<p>LPKF Laser & Electronics AG (Germany) Booth no.: 5F-D02</p>	<p>LPKF ProtoMat S103</p> <ul style="list-style-type: none"> ● From an idea to a close-to-production board in only one day – with LPKF rapid PCB prototyping solutions. ● LPKF ProtoMats mill and drill circuit boards directly from the layout data – there is no need for etch chemistry and the sensitive design data stays in-house.

	Product Photo	Exhibitor	Product Description
6		<p>Meco Technology Limited (Hong Kong) Booth No.: 5G-B23</p>	<p>Sapphire Crystal used on Smart Devices</p> <ul style="list-style-type: none"> ● Applications on mobile panels can provide good optical effects and high abrasion resistance at the screens, it can reduce scatter and eliminate the protective films. ● Meco is producing sapphire boule and ingot which is a basic material in LED production. Meco can tailor-made the mobile phone screen in different flatness, parallelism and surface roughness according to customers' requirement.
7		<p>Memory Protection Devices, Inc (US) Booth no.: 5F-E01</p>	<p>Low Profile CR2032 Coin Cell Holder</p> <ul style="list-style-type: none"> ● While other holder solutions often rise 8 to 10mm above the PCB, the new LP2032SM-JJ-GTR rises under 5mm with an installed CR2032 battery. This directly saves more than 3mm in height when compared to typical battery holders available in the market. ● CR2032 equips with superior dielectric strength (1,100 volts/mil) and boast excellent chemical and humidity resistance that can withstand multiple applications of most sterilization methods like autoclave, chemical, ETO, or radiation. ● It resists shocks, vibrations and drops. ● It is packaged on tape and reel for automated systems.

	Product Photo	Exhibitor	Product Description
8		<p>Nano and Advanced Materials Institute Limited (Hong Kong) Booth No.: 5G-A26</p>	<p>Copper Indium Gallium Diselenide (CIGS) Thin Film Solar Cell</p> <ul style="list-style-type: none"> ● Compared with traditional Silicon-based solar panels, CIGS absorption layer has wider solar absorption spectrum and thus is able to generate more electricity under different conditions of solar irradiation. ● CIGS cell has shown conversion efficiency of over 20% in laboratory, which is the highest among all thin film photovoltaic cells. In addition, the stable grain structure of CIGS materials allows them to maintain stable electrical generation for years.
9		<p>Oki Sensor Device Corporation (Japan) Booth no. 5G-A25</p>	<p>Oki Reed Switch</p> <ul style="list-style-type: none"> ● The technologies – contact surface deactivation treatment, high-performance automatic sealing machines and contact resistance measurement based on the flux scanning (FS) system, have earned Oki the top market share in the world. ● Oki broad product line allows the customer to select a product to suit the intended application and purpose for everything from low-voltage signal lines to high-voltage power lines.

	Product Photo	Exhibitor	Product Description
10		Orient Electronics Inc. (Korea) Booth no. 5F-D20	JSF Series Power Supply <ul style="list-style-type: none"> ● JSF series power supply unit is designed with a robust structure. It is well-engineered to deliver reliable and stable performance. The over voltage and over current protection ensure ultimate reliability. ● The JSF Series are of low cost, inrush current limit, wide input voltage range (universal input voltage / user selectable input voltage) and PFC as standard (180W, 240W).
11		Prokit's Industries Co., Ltd (Taiwan) Booth No. 5F-E23	Prokit's MT-8006B Data Diver <ul style="list-style-type: none"> ● MT-8006B Data Diver is an environmental friendly portable telecom test set. ● Data is under high protection with protection circuit and ringer and voltage LED indicator to prevent the accidental disruption of data services and with the high impedance for data safe operation without disrupting existing traffic and identifying the telephone line polarity. ● There is a built-in RJ-11 port for easy test leads change. ● 12 phone number memory for speed dialling, while each memory is up to 32 digits phone number memory for speed dialling and battery life saves up to 6 months. ● 16 digits LCD panel, backlight, angled bed of nails and durable belt clip for dark area, in/outdoor testing and operation hands free.

	Product Photo	Exhibitor	Product Description
12		<p>Santek Hong Kong Limited (Hong Kong) Booth No.: 5F-G20</p>	<p>Sunlight readable TFT-LCD</p> <ul style="list-style-type: none"> ● Santek manufactures sunlight readable TFT display with sizes ranging from 3.5" to 10.2". The brightness or luminance of these modules reaches 400, 800, 1400Cd/m2 among the top in the industry. ● These displays are particularly suitable for outdoor display applications, for example handheld devices, vending machines and POS. ● Santek can provide additional service to equip the TFT with touch function. Moreover, by using their special <i>OPTOGEL</i> (optical transparent gel) to replace traditional gel between the touch panel and display, the visibility, luminance, shock & heat absorption ability is stronger than other similar products.
13		<p>Shenzhen Topray Solar Co Ltd China (Mainland) Booth No.: 5E-G22</p>	<p>TPS-218 Solar Portable Power Kit</p> <ul style="list-style-type: none"> ● High portability with briefcase design, solar panel inclusive and no external grid connection needed ● Apart from basic re-charging lap-top and mobile phones, it is also supportive to electrical appliances for long hour operation with connection to an external battery. ● TPS-218 is designed with high adaptability with multiple connecting wires, such as alligator battery clamps and cigarette lighter plugs.

	Product Photo	Exhibitor	Product Description
14		Surface Mount Technology Ltd (Hong Kong) Booth No.: 5G-C06	Green Manufacturing (electronics manufacturing services) <ul style="list-style-type: none"> ● Adopt environmental education program: Implement Corporate 6R culture (Re-educate, Re-design, Reduce, Reuse, Reinvent and Recycle) ● Energy Conservation: Several ways to save energy in daily practice, such as machine and building insulation, lighting and power factor correction ● Carbon Emission Program: Compiled with the Chinese mainland government to reduce carbon emission intensity ● Regulatory Compliance: Restriction of Hazardous Substances (RoHS) compliant (vendor control, materials control, stock control, production process control, tooling control)
15		Tamaohm Co., Ltd. (Japan) Booth No. 5F-G24	High Power Ribbon Wire Wound Fixed Resistor <ul style="list-style-type: none"> ● Uniquely in the market, this resistor is RoHS compliant and small in size, with extremely superior heat release functionality, making it optimum for high current circuits which require low resistance value.

	Product Photo	Exhibitor	Product Description
16		Thai Lin Radio Coil Manufactory Limited (Hong Kong) Booth No.: 5G-C24	<p>Energy Related Products (ErP) series – Encapsulated Transformer</p> <ul style="list-style-type: none"> ● The Energy Related Products (ErP) series has attained the approval of TÜV[^]/CE* EN61558 & EN60950 and has met energy standard required by the European Union. ● With the design of the 230V +/-15%, comparing to the general +/-10%, it increases the durability especially for non-stable power sources. ● The sophisticated design like inherent short-circuit proof, 4000Vrms dielectric strength, potted under vacuum and 0.5 or even lower watts of standby power consumption highly contributes to environmental friendliness. <p><i>[^] TÜV Rheinland (Technical Inspection Association)</i></p> <p><i>* Communauté Européenne (European Union): proves that the product in question conforms to EU health and safety standards</i></p>
17		Top-up Industry Corp. (Taiwan) Booth no. 5F-C16	<p>Top-Up LED Ring</p> <ul style="list-style-type: none"> ● The new LED indicator circle and ring collection for THT type (Through Hole Terminal) is designed with window and non-window types. It features red, orange, yellow, green and blue LED lighting.
