2	 <p data-bbox="240 757 692 887">LPKF Laser & Electronics AG (Germany) Booth No.: 5F-D02</p>	<p data-bbox="754 136 1066 170">LPKF ProtoLaser 3D</p> <ul data-bbox="754 185 1473 1070" style="list-style-type: none"> ● ProtoLaser 3D is new product in 2015 and unique to the market. ● Modern electronics products are showing a trend towards smaller size, greater complexity, and more functions. Extension of the interconnect pattern into the third dimension adds new potential – and laser direct structuring (LDS) is the leading technology in this field. With the ProtoLaser 3D, LPKF offers an economical and efficient laser system that accelerates prototyping of three-dimensional substrates. It was developed especially for LDS prototyping but is based on the proven ProtoLasers used for PCB prototyping. ● Product application: Prototyping 3D molded interconnection devices in laboratory environment. Prototypes for aviation, aerospace, automobile, communications and medical & rehabilitation areas.
3	 <p data-bbox="217 1429 719 1559">Taiwan Oasis Technology Co Ltd (Taiwan – Taiwan Pavilion) Booth No.: 5F-C23</p>	<p data-bbox="754 1093 1098 1126">TOF-5465 LED Display</p> <ul data-bbox="754 1142 1473 1413" style="list-style-type: none"> ● TOF-5465 LED digital displays are used in home appliances, financial information displays, medical instruments, industrial equipments and other application fields. A wide range of designs and customization services are also available.

	Product Photo / Exhibitor	Product Description
4	 <p data-bbox="236 465 702 600">Dong-Yang Electronics Co Ltd (Korea) Booth No.: 5F-E07</p>	<p data-bbox="756 134 1228 168">Thermal Fuses, Thermal Cutoff</p> <ul data-bbox="756 179 1468 739" style="list-style-type: none"> ● DYE Thermal Fuses are used to prevent fires caused by abnormal heat generation from circuits and other heat produced by electric and electronic products. They are one-shot (non-resettable) thermal fuse that separate electrical contacts when the temperature exceed the pre-set value. ● Product application: Home electric appliances, heating devices, coil-winding products, power supplies, office equipment, telecommunication devices, automobiles and other electronic components.
5	 <p data-bbox="271 1043 663 1178">Hylax Technology Pte Ltd (Singapore) Booth No.: 5F-D18</p>	<p data-bbox="756 757 1302 790">Hylax HT5700 Laser Drilling System</p> <ul data-bbox="756 801 1468 1747" style="list-style-type: none"> ● Laser drill through 2D matrix code on copper lead frame. ● HT5700 laser drilling system is the latest innovative product from Hylax. With its high power output and superior mode quality, it is optimised for marking through hole characters and 2D matrixes on copper lead frame. Through special software control the processing speed is increased and result is clean holes with minimal discolouration. Through hole marking in lead frame is important in manufacturing for assured traceability from begin to end of the production process as the product may go through plating and other eroding processes. Also a drill through mark is identifiable from both top and bottom side of the lead frame for added convenience. ● Product application: Laser Marking, Cutting and Micro-Machining.

	Product Photo / Exhibitor	Product Description
6	 <p data-bbox="252 517 687 645">Dailywell Electronics Co Ltd (Taiwan – Taiwan Pavilion) Booth No.: 5F-D19</p>	<p data-bbox="754 136 932 165">MPB Series</p> <ul data-bbox="754 181 1469 831" style="list-style-type: none"> ● Newly launched in 2015, the MPB series is UL Approval product with Ingress Protection: IP67, IK10 (Stainless) and its electrical rating is Ith: 5A/Ui:250 VAC, Ie:3A/Ue: 250VAC (resistive load) ● It is a stainless steel housing products with variety of LED colors, RoHS Compliant, ● It is easy for installation, light weight, high strength, corrosion resistance, aesthetic and easy heat dissipation. ● Product application: Parking equipment, Elevator equipment, Door systems, Industrial remote controller, Medical devices and communication devices.
7	 <p data-bbox="252 1189 687 1317">Westpan Electronics Co Ltd (Hong Kong) Booth No.: 5G-B15</p>	<p data-bbox="754 853 1235 882">Bluetooth Low Energy Modules</p> <ul data-bbox="754 898 1469 1167" style="list-style-type: none"> ● BlueSoleil Bluetooth low energy modules address the needs of new modern wireless applications such as ultra-low power consumption, fast connection times, reliability. ● It is applicable on car wireless, speaker and sound bar.
8	 <p data-bbox="212 1765 721 1892">Santek Hong Kong Limited (Hong Kong) Booth No.: 5F-G20</p>	<p data-bbox="754 1335 1086 1364">LCD Transparent Box</p> <ul data-bbox="754 1379 1469 1794" style="list-style-type: none"> ● Santek manufactures LCD Transparent Box which are designed to revolutionize product showcasing with video backgrounds and interactive touch. ● Advantages: <ul data-bbox="850 1626 1469 1794" style="list-style-type: none"> ○ Size and case can be customised. ○ Android is pre-installed. ○ Wifi and multi-point touch function are available.

	Product Photo / Exhibitor	Product Description
9	 <p data-bbox="236 658 699 835">Nano and Advanced Materials Institute Limited (Hong Kong) Booth No.: 5F-G30</p>	<p data-bbox="754 136 1177 170">Flexible Lithium Ion Battery</p> <ul data-bbox="754 181 1469 792" style="list-style-type: none"> ● Flexible Lithium Ion Battery is a unique flexible battery for future flexible portable consumer electronics. ● The electrode nanofibers are fabricated as a porous mesh with electrospinning technology and high porous solid electrolyte. ● It is applicable on smart devices, flexible displays, wearable electronics and flexible medical devices. ● Advantages: <ul data-bbox="850 663 1417 792" style="list-style-type: none"> ○ Safe. ○ Can be cut in any shape. ○ Light weight with high energy density.
10	 <p data-bbox="244 1144 691 1272">Best Rubber Product Limited (Hong Kong) Booth No.: 5G-C13</p>	<p data-bbox="754 853 1062 887">Membrane Switches</p> <ul data-bbox="754 898 1469 1415" style="list-style-type: none"> ● Best Rubber Product Limited specialises in conductive silicone rubber keypad, membrane switch and alloy or plastic back panel. ● Application: Overlay faceplate of electrical appliances ● Advantages: <ul data-bbox="850 1189 1469 1415" style="list-style-type: none"> ○ Thin, compact and environmentally robust. ○ Relatively low cost, versatile and durable. ○ Moisture and dirt resistance.
